When shooting portraits focus needs to be precise. The majority of your shots of people will need to have their eyes in perfect focus. Switching to manual focus will give you complete control to enable this rather than having to line up the focusing points on your camera on the eyes prefocussing by pressing halfway down and then having to frame your shot.

When is Manual Focus Better than Auto Focus?

Minolta (株式会社, minoruta) was a Japanese company that, under one name or another, manufactured cameras from 1929 to 2003. It produced cameras for many film formats, from 16mm film to medium format.. In the 1950s Chiyoda, as it was then called, ventured beyond production of cameras and binoculars into business services, and eventually into photocopiers.
