anatomy and physiology chapter 10 blood Flashcards and ...

Blood is the “river of life” that surges within us. It transports everything that must be carried from one place to another within the body- nutrients, wastes (headed for elimination from the body) and body heat through blood vessels. Long before modern medicine, blood was viewed as magical, because when it drained from the body, life departed as well.

chapter 10 anatomy and physiology coloring workbook ...

the tissues. The cardiovascular system includes the heart, blood vessels, and blood. We will look first at the heart and the blood vessels, and then at the blood that flows through that closed circuit (Figure 11.1). The heart resides in the center of the thoracic cavity, literally hanging by the great blood vessels that deliver and remove ...

The Cardiovascular 11 CHAPTER OUTLINE System

system which circulates blood throughout the body. The urinary system filters, stores, and conducts some wastes from the body. The bladder and urethra are part of the urinary system. The testes and ovaries are part of the reproductive system and this system perpetuates the species. The differentiation of male and female systems makes this organ system

Chapter One: Introduction

This unit provides 20 plates illustrating nerve cells, the physiology of signal transmission, the human brain, spinal cord, and individual nerves of the human nervous system. Completing the coloring activities of the main nervous organs will help students in retention and recall of the nervous system. Available coloring activities:
