I've got a 2006 VW Golf 140 TDi (BKD). I had the DMF changed last year therefore I'm fairly certain that MY rough idle and mis-fire problems aren't down to that. When cold, the car bounces and jerks like crazy when at around 1,000 - 2,000rpm with light throttle and if put into 'N' at stand-still, the engine wobbles like hell.

While on the topic of timing, we need to understand that there are three types of timing involved here: 1. The first and most overlooked type of timing is the cam and crank timing. This keeps the cam spinning in perfect time allowing the engine to produce great low-end power as well as allowing the engine to rev to its full redline of 5100 ...
