Before I found this site I was on PWCToday and RIVA. I am having trouble with the stator on my VX110 and a user on one of those forums has been a big help. After troubleshooting I determined that the stator was bad on my VX110. Now I had to ask how do you get it out. That's when user Billcosca gave me his step by step process of getting the engine out in 15 minutes!

How hard is it to remove the engine in a 2001 Yamaha GP1200R? I have to replace the drive shaft under the engine, and also the one that attaches to the impeller. I already have the rear one out, and now I have the inner one. Whats involved, and how long of a job is this? Any help would be appreciated. Also, if you already did this, where do I start, and if you have directions on which parts ...
