Collins CSEC® Biology Workbook answers A1 Classification

shown by the graph in Figure 2.2. As the prey population increases, there is more food for predators. The predators can use the energy from the food to have more offspring. So, after a slight lag, the predator population increases as well. As the number of predators increases, more prey are captured. As a result, the prey population starts to decrease.

Biology Population Worksheets - Printable Worksheets

Dynamic Change. Like the individual organism, the population is a real and functional unit in biology. Defined as groups of organisms that are genetically and spatially distinct from other such groups, the population is the fundamental unit of evolution. Populations are dynamic, they grow, decline, colonize new populations, and go extinct.
