Abstract. In this chapter, theories for deadend microfiltration are presented. The first part of the

chapter focuses on the sieving or surface filtration mechanism, which is dominant when the particles are physically too large to pass through the pores of the filter medium.

Theory for Deadend Microfiltration | SpringerLink

The filtration of protein solutions, especially in the manufacture of biologically derived proteins, is a large and increasingly important step in the production of protein pharmaceuticals. The focus of this chapter is on the use of membrane filters for purification and sterilization of protein pharmaceuticals.
