Definition of Logistics. [Part 1 : System Management] Logistics. Logistics is the art and science of management, engineering, and technical activities concerned with customer requirements, product design, maintaining and supplying resource to support objectives, plans, and operations. (SOLE-The International Society of Logistics)

Introduction to Logistics. - IEMS

Abstract. Reliability is one of the most important characteristics of the functioning of supply chains. The carried out analysis have shown that, despite some progress, a number of questions remain open, in particular, the terminology, the selection of key indicators and methods of their calculation as well as there is no economic evaluation of redundant and restorable supply chains.

Problems of the Supply Chain Reliability Evaluation ...

Blanchard's dedicated trucking services in Connecticut can handle your company's biggest transportation challenges. Wherever your business takes you, Blanchard will get you there... There's no substitute for experience in dedicated trucking, especially in the congested Northeast region.
