The Allison Model 250, now known as the Rolls-Royce M250, (US military designations T63 and T703) is a highly successful turboshaft engine family, originally developed by the Allison Engine Company in the early 1960s. The Model 250 has been produced by Rolls-Royce since it acquired Allison in 1995.

**Allison Model 250 - Wikipedia**

C20B Capabilities Rolls Royce C20B Modular Turboshaft/Turboprop engine. This Allison model 250 engine was first developed for the US Army for Light Helicopter and light observation aircraft use. Since Rolls Royce took over the manufacture of these engines, they have become known as the RR250, or M250.

The inhaled air increases the combustion of the engine which increases its power. Steam turbine engines use thermal energy from pressurized steam to create the force needed to turn the output shaft. Larger steam turbine engines are used to generate electricity in power plants, while smaller units are used in boats to turn the propeller shafts.
