SerpBook is a powerful rank tracker that delivers real time data. SerpBook rank checker is perfect for local tracking, and whitelabel reports.

SerpBook - Rank Tracker Providing Real Time Data

A search engine lists web pages on the Internet. This facilitates research by offering an immediate variety of applicable options. Possibly useful items on the results list include the source material or the electronic tools that a web site can provide, such as a dictionary, but the list itself, as a whole, can also indicate important information.

Wikipedia:Search engine test - Wikipedia

A web search engine or Internet search engine is a software system that is designed to carry out web search (Internet search), which means to search the World Wide Web in a systematic way for particular information specified in a web search query. The search results are generally presented in a line of results, often referred to as search engine results pages (SERPs).

Attention: many search engine submission tools don't work. Most search engines don't like submissions from automated submission tools. The reason for that is simple: the creators of most search engine submission software tools don't care about the specific rules of the search engines, and the creators just want to list as many engines as possible.

Search engine submission software - iBusinessPromoter SEO

In April of 1997 Ask Jeeves was launched as a natural language search engine. Ask Jeeves used human editors to try to match search queries. Ask was powered by DirectHit for a while, which aimed to rank results based on their popularity, but that technology proved to easy to spam as the core algorithm component.
