A karyotype is the number and appearance of chromosomes in the nucleus of an eukaryotic cell. The term is also used for the complete set of chromosomes in a species or in an individual organism and for a test that detects this complement or measures the number.. Karyotypes describe the chromosome count of an organism and what these chromosomes look like under a light microscope.

The second question that should be asked about Fig. 1 is: "What is the status of the data in terms of our current knowledge of the localisation of human brain function?" In other words, is the information portrayed in the figure accurate, as far as we know today? The answer, perhaps surprisingly, is that this figure is remarkably accurate.

History and future directions of human brain mapping and ...
