Jack, an instructor at Columbia Business School, taught his online entrepreneurship course asynchronously through his institution LMS. He was interested in incorporating a Wiley business text into his course, but wanted to deliver this Wiley content seamlessly with his own reading materials and video content.

Course Catalog | WileyPLUS

Glucose (also called dextrose) is a simple sugar with the molecular formula $C_6H_{12}O_6$. Glucose is the most abundant monosaccharide, a subcategory of carbohydrates. Glucose is mainly made by plants and most algae during photosynthesis from water and carbon dioxide, using energy from sunlight. There it is used to make cellulose in cell walls, which is the most abundant carbohydrate.

Glucose - Wikipedia

Single nucleotide variants (SNVs) occur when a single nucleotide (e.g., A, T, C, or G) is altered in the DNA sequence. SNVs are by far the most common type of sequence change, and there are a number of endogenous and exogenous sources of damage that lead to the single base pair substitution mutations that create SNVs.
