How do you shift - answers.com

How do you drive a manual shift car? get in push the clutch then turn the key and put in 1st gear and drive Clutch in, as above, 1st, drive the car, clutch in, 2nd, then so on.

How do you know when to shift gears in a manual car?

You shift down when you want more power (for acceleration), and up when you want less power (for efficiency + less noise + less jumpy throttle). The other constraint is that if the engine speed is too low, the engine becomes unsmooth, possibly less efficient, and possibly wears down faster due to less oil flow.

How to know when to shift gears in a manual car - Quora

Here's Exactly When You Should Upshift for the Fastest Acceleration. Want to shift for the fastest 0-60 and quarter-mile time? Here's how to pick the right shift point for any car.

Here's Exactly When You Should Upshift for the Fastest ...
