I can easily post you diagram really CM870 EGR is just a motor with potentiometer style position sensor (3 wires). But EGR works in cooperation with VGT, so check all components Volvo EGR system is much more complicated (2 EGR valves) and every is twice more expensive Cummins EGR. Late D13 EGR is oil pressure driven (like on Series 60).

Not that I would ever bypass the EGR system on a diesel engine....I think it is a complete waste of time and effort. But there is absolutly no way this would be checked on a roadside inspection, or weigh station. You simply cant tell from just looking at the outside of the EGR valves (on a D12 volvo anyways).
