Spectroscopy Problems. In each of these problems you are given the IR, NMR, and molecular formula. Using this information, your task is to determine the structure of the compound. The best approach for spectroscopy problems is the following steps: Calculate the degree of unsaturation to limit the number of possible structures.

A regular eye exam focuses on the general health of your eyes, while a contact lens exam is focused specifically on how your eyes react to contact lenses. A contact lens exam tests how well you see while wearing contacts. Your eyes are also evaluated to make sure your tear ducts produce enough tears to allow you to comfortably wear contact lenses.
