A population pyramid also called an age pyramid or age picture is a graphical illustration that shows the distribution of various age groups in a population, which forms the shape of a pyramid when the population is growing. In Excel, we can create population pyramid chart using a bar chart, just like below one.

A population pyramid does not tell you the actual population in numbers. Rather, it displays percentages and shows what portion of people fall into each cohort. Demographers use population pyramids to see population trends in the past, examine the current resident profile, and also to project how the population will increase/decrease in the future.

A population pyramid is a pyramid-shaped diagram illustrating the age distribution of a population; the youngest ages are at the bottom ascending in age till the oldest age at the top of the pyramid. How do you read a population pyramid? The title of the Population Pyramid. Usually, this is the name of the location along with the year.
