Trim tabs are small surfaces connected to the trailing edge of a larger control surface on a boat or aircraft, used to control the trim of the controls, i.e. to counteract hydro- or aerodynamic forces and stabilise the boat or aircraft in a particular desired attitude without the need for the operator to constantly apply a control force. This is done by adjusting the angle of the tab relative ...

Trim tab - Wikipedia

A traffic collision avoidance system or traffic alert and collision avoidance system (both abbreviated as TCAS, and pronounced / t i: k æ s /; TEE-kas) is an aircraft collision avoidance system designed to reduce the incidence of mid-air collisions between aircraft. It monitors the airspace around an aircraft for other aircraft equipped with a corresponding active transponder, independent of ...

Traffic collision avoidance system - Wikipedia

Modern fighter jets have been designed to withstand 8,000 total hours of flight time during their operational lifespan. With an average of 200 hours in the air each year, this means they are expected to continue delivering high performance in sorties and missions for somewhere between thirty and forty years.
