Bar Stock Model Steam Engine

Complete plans to build a simple steam engine. These steam engine project plans were created by Bill Reichart. The Pip-Squeak was designed to be a very first, easy to build engine. It is built from bar stock. No castings are required. It can be made on a small hobby lathe and a small drill press. A small milling machine helps, but isn't necessary.

Steam Engine #6 - PM Research - Model Engine Kits

Experience Levels. As a general rule, if you are new to machining and have not built any engines of any kind, you would be advised to build a few bar stock steam (air pressure) engines to develop a 'feel' for the accuracy of fit that engines require before attempting a hot-air or internal combustion engine.

About Plans - JE Howell Model Engine Plans

This engine was designed following a number of requests for a simple machining project. There are many other oscillating steam engine designs, and some are much simpler, using plumping fittings and wire links etc... However because this engine was designed to be a machining project, bar-stock was used for all the parts.
