In the last 10 years one of the biggest changes here at VPD has been the increased power available from our normally aspirated engines. When we started 140 - 150 HP was typical for a modified Volvo B20 street engine and the only way to get close to 200 HP was in a high compression, high rpm race engine.

A V8 engine is an eight-cylinder V configuration engine with the cylinders mounted on the crankcase in two sets (or banks) of four, with all eight pistons driving a common crankshaft. Most banks are set at a right angle (90°) to each other, some at a narrower angle, with 45°, 60°, and 72° most common. In its simplest form, the V8 is basically two parallel inline-four engines sharing a ...

An overhead valve engine (OHV engine), or pushrod engine, is a reciprocating piston engine whose poppet valves are sited in the cylinder head. An OHV engine's valvetrain operates its valves via a camshaft within the cylinder block, cam followers (or "tappets"), pushrods, and rocker arms.. The OHV engine was an advance over the older flathead engine, whose valves were sited within the cylinder ...
