### **Whats More Fuel Efficient Manual**

Traditional automatic transmissions can also beat manual fuel economy. Today's automatics tend to have more forward gears (those are gears that move the car forward, not in reverse) than manual transmissions do. Those extra gears help the engine deliver the same power to the wheels while working at a lower engine speed, which saves gas.

The bridge between manual and automatic is getting smaller and smaller. It has often been taken as a given that manual cars are more fuel-efficient than automatics, with automatics often disregarded as being overly heavy on fuel. But there have been some significant moves made to improve the technology in automatic vehicles.

### **Are automatic cars now more fuel-efficient than manual?**

Manual transmissions often deliver better mileage because they are more efficient. If you put an automatic car and a manual car with identical engines on a dyno, the manual transmission will ALWAYS deliver more power to the wheels. The reason for this is that less power is lost in the transmission.
