A W12 engine is a twelve cylinder piston internal combustion engine in a W configuration.W12 engines have been manufactured in two distinct configurations. The original W12 configuration used three banks of four cylinders coupled to a common crankshaft, with 60° angles between the banks.

### **W12 engine - Wikipedia**

Bugatti did two things to create a compact engine capable of producing 1,000 hp. The first and most obvious thing is turbocharging.. If you have read How Turbochargers Work, you know that one easy way to make an engine more powerful without making the engine bigger is to stuff more air into the cylinders on each intake stroke.Turbochargers do that.
