ZPL - Zebra Programming Language. If you need to drive a Zebra barcode label printer from your own software application, whether it be a PC based application or from a mobile device without using a Windows printer driver, ZPL is the answer.

## **ZPL - Zebra Programming Language - Barcode Datalink**

ZPL isn't a programming language, it's a printer language. As I know, ZPL does not support variables. Your program should do this by building a correct ZPL code. Building a program that does a simple substitution of a fixed string inside a text should do the trick very easy in nearly every programming language. That's what the designstudio is doing.

## **How to manually define a variable in Zebra Programming ...**

Zebra Printer Mirror Process Zebra "alpha series" mobile printers (e. g. QL 220, RW 420) support a file mirroring process that allows the printer to synchronize files with those stored on an FTP server. Since the process relies solely on the FTP standard, no other special utilities are required.

Hi, I've designed a label that contains a section at the bottom to hold delivery numbers. I can't predict how many delivery numbers will be on each label, but I'd like the font to be as big as it can be for only one delivery number and then automatically get progressively smaller as up to twelve delivery numbers are sent through.
