Energy Professional Services in North Carolina

This DIY blower door uses a multi-speed furnace blower for the fan and is fitted into a window rather than a door. An inexpensive (but accurate) off the shelf pressure gage is used to measure the house depressurization. With a little scrounging, it can be built for inside of \$30. The furnace blower blower door mounted in a window.

A DIY Blower Door -- Easy to Build -- Easy to Use -- Cheap

A basic blower door system includes three components: a calibrated fan, a door panel system, and a pressure measurement device . Test setup. The blower door fan is temporarily sealed into an exterior doorway using the door panel system. All interior doors are opened, and all exterior doors and windows are closed.
