My BMW E53 is throwing a service engine and when I scanned.... This valve regulates a vacuum on the crankcase, when they fail, a high vacuum is put on the crankcase - giving an air leak. You can check for this by removing the oil filler cap with the engine running, if there is a high vacuum holding the cap down, the engine stalls, or idle dips a lot, then this valve has failed and is your problem.

My BMW E53 is throwing a service engine and when I scanned ...

Engine Valley Pan and Coolant Pipes Removal. The BMW cooling system on their 8-cylinder engine uses cooling pipes underneath the intake manifold to return coolant from the back of the block. This involves a manifold and two cooling pipes leading from the rear coolant manifold to the water pump.
