### **Bicycle Engine Carb Adjustment**

My bike rides like it's choked a little bit and won't get above 22 or so (maxes around 30). I took the intake filter off and it rides beautifully without the filter. Cleaned it, put it back on, rides like it's choked. I know little about carbs. But it sounds like I need to open it up and adjust the needle or float or whatever that is.

### **carb adjustment? | Motorized Bicycle Engine Kit Forum**

The NT carb supplied with most typical HT engine kits is very simple and so should be easy to tune, but many have trouble getting it right, resulting in low power, low revs, smoky exhausts, fouled plugs and excessive buildup on heads/pistons if the mixture is over-rich or, in the other extreme, overheating, melted pistons, seized engines if the ...

Turn the adjusting screw 6-8th of a turn out. Test the bike by riding it. If the engine is bogging, fuel leaking from the carburetor, or any improper performance, stop the bike and turn out the adjusting screw another 6-8th of a turn. Repeat steps 5 & 6.

### **CNS Carburetor Tuning Guide | Bikeberry Blog**

ok, so i got the engine kit from dax. Is there a way to adjust the carb., because from what i see, there is only the "idle adjusting screw" (or that's what it seems to be), and something that seems to be like a primer pump thingy??? and there is also a hole next to the air intake underneath the air filter.
