The goal of the OpenATM Project at openATM.org is to make Feldenkrais Awareness Through Movement (ATM) Lessons available to everyone around the world.. In ATM classes, students are guided through a sequence of gentle movements. By moving slowly and paying attention, the nervous system discovers new possibilities and lets go of less functional habits or patterns.

Frailty is the most problematic expression of population ageing. It is a state of vulnerability to poor resolution of homeostasis after a stressor event and is a consequence of cumulative decline in many physiological systems during a lifetime. This cumulative decline depletes homeostatic

reserves until minor stressor events trigger disproportionate changes in health status.
