Adjust pitch and roll with the controls to center the flight director indicators - the pink lines on the Primary Flight Display (PFD). You should try to keep the pink lines centered in the PFD. This will direct your airplane to climb at the maximum safe climb rate while ensuring that you remain on the heading you've entered into the MCP.

electronic flight instrument systems integrate many individual instruments into a single presentation called a primary flight display (PFD). Since all flight instruments are combined in one integrated electronic flight instrument system, a number of enhancements to conventional flight instruments are now possible.

Chapter 02: Electronic Flight Instruments

Each FMC/CDU is linked to it's own Flight Management Computer mounted in the aircraft's electronics bay. Each FMC is comprised of five processors, and integrates data received from the air data sensors, crew input, navigation radios, engine and fuel sensory systems, inertial reference system and internal navigation database.

The Laminar Research / X-Plane 11 G530 system will be referred to here as the X530. This has been developed by our team to resemble the Garmin 530, both in appearance and function. However, the capability and operation of this device in the simulator may differ in some areas to the real product.

X-Plane 530 Pilot Operating Manual

The Flight Crew Training Manual (FCTM) is published as a supplement to the Flight Crew Operating Manual (FCOM) and is designed to provide pilots with practical information on how to operate the Airbus aircraft. It should be read in conjunction with the FCOM. In the case of any conflict, the FCOM is the over-riding authority.
