Looking at what seems like a good deal on a 2006 with a VT365. Just growing the net, the VT365 doesn't get the standard "good reviews" that the DT466 gets. I see that this is an engine they build a Powerstroke with at one time. Supposedly, different fuel pump, and the Int'l detuned. What you know about em?

The VT 365 was "packaged" up so as to fit in tight applications such as Ford vans, so all that "stuff" got placed in the engine "V" which led to the VT365s cooling system being plumbed in series. This type of plumbing can lead to those domino type of failures where a problem in one component takes out a component down the line.
