Disconnect battery, remove coolant holding tank and bracket, disconnect exhaust and remove muffler. Then you have four bolts at the four corners of the engine and pump sub-frame. Remove those bolts (3/4" drive) and the engine will lift out from the rear with the pump still attached. This is the bobcat approved way and written up in the service ...

Re: Bobcat engine removal. There should be an access panel behind the seat IIRC ? pulling engine eh well if you have something with long forks on it you will need that for when you pull the engine to reach back in there and get a good grab on the engine. and of course unhook the hydro lines and all your cables.
