The BMW N52 straight-six was designed to replace the M54 and was introduced in 2004, remaining in production until 2011. The engine made its debut in 258hp, N52B30 form in the E63 630Ci and was joined by the N52B25 in 2005; the larger engine had five differing power outputs while the smaller variant was made available in three different versions.

**BMW N52 straight-six - lightweight and modern engine - Drive**

The N52 in my opinion is the more advanced engine than the N54, for example it has a lighter magnesium-aluminium block and valvetronic which is missing on the forced induction N54 engine.

So I am looking at the new line of engines coming out and looking back at the N52 and the engine it replaced and although technically it has some really cool items, functionally it seems like one of the most disappointing engines bmw ever made. In reality there was very very little performance improvement over the M54 I6 engine producing 225hp.
