The 9a/KR head castings are near enough the same, and the exhaust cam is the same between the 2 engines. To prevent the PL/9a injection system killing the CAT VW had to put in a very mild inlet cam, which is why the 9a makes relatively little power for a 2.0! VW got it right with the ABF (2.0 16v fitted to the euro MK3) got 150BHP from the factory

Wiring and Sensors you take the 8v TPS off. It will throw a check engine and it won't idle very well if you get it to far closed. Ignition is alittle bit more complicated still. The problem here is the 16v distributor has a four window hall sensor, while the 8v uses a one window sensor. Not only that but the 16v distributor spins the opposite ...
