Virus And Bacteria Worksheet Answers - FREE Printable ...

Bacteria are microscopic living organisms, usually one-celled, that can be found everywhere. They can be dangerous, such as when they cause infection, or beneficial, as in the process of fermentation (such as in wine) and that of decomposition.

bacteria - Dictionary Definition : Vocabulary.com

Bacteria and viruses can be controlled. Since bacteria are living, one way you can control them is to kill them. This can be done by taking antibiotics such as penicillin or tetracycline. The word antibiotic means "against living things" and they only kill living things. Since viruses are not living, can they be killed?_____
