This guidebook is dedicated to the membrane technologies applied in wastewater reclamation processes. The reasons for a separate book on wastewater reclamation technology are related to the unique treatment challenges, potential of sufficient availability, and affordable economics of utilizing this water source:

Wastewater Reclamation - rotechnology1.wordpress.com

Construction of new wastewater treatment infrastructure is usually not a high priority, and the associated costs can be prohibitive. The Integrated Fixed-Film Activated Sludge (IFAS) process is a cost-effective way to retrofit existing facilities so they can treat more wastewater, more effectively, using their existing tanks and resources.
