I have some experience of diesel engine maintenance and tried to change the engine oil on my Volvo KAD32 today. Lately as the compressors cut in the master fuse pops and I am seeing a lot of black (unburnt fuel) in the exhaust.

I have a 2003 Carver ACMY with Volvo Penta KAMD-300's. The starboard engine is leaking oil at the aft end of the engine. I have been told that the aftercooler weeps oil and this is normal, however, the amount of oil I am seeing on the sorbent pad below the aft part of the engine seems significant to me.
