The British Seagull® was a British manufacturer of two-stroke outboard engines in Poole, Dorset from the early 1930s until the mid-1990s. Although their "Classic" engines were for decades an exemplar of rugged simplicity and reliability, the company eventually failed when customer tastes

changed and as tighter emissions regulations took effect.

### **British Seagull - Wikipedia**

One point I would like to make is the position of the float chamber. British Seagull stated it was important to fit it furthest away from the tank, not as here. Now I cannot see the difference it makes, except that the choke assembly fits snugly into the float if fitted as British Seagull suggest, and the choke flap is somewhat protected too.
