Engine Tin ~~~ Underlying premise: The VW engine is cooled by AIR. The engine compartment in a VW, including the tinware surrounding the engine, is a closed system designed to keep air flowing around the oil cooler and cylinder and head fins. Anything that defeats this system will make the engine run hot.

VW Engine Tin and Chrome Dress-Up Kits. VW Engine Tin is crucial to ensuring your VW engine runs cool. The tin directs air from the top portion of the engine compartment through the oil cooler, cylinder heads and cylinders. It also keeps that same hot air from re-entering the engine compartment which would increase the engine temperature.

6 x 12mm Sheet Metal Screw w/Washer (Phillips Pan Head), Each, N107101-PHILLIPS are the screws which hold the VW Engine Tin in place. They are used Extensively throughout the engine, securing the tin and backing plates in place. The Phillips version was used on the Type 4 engine since it is much easier to install in hard-to-access places.

Building Up a Longblock ~~~ Note: This is a VERY LONG procedure. ... Install the rear engine tin. ... The reason for the varying of engine rpm at initial start-up is that the VW flat four engine does NOT adequately oil the camshaft lobes and lifter heads at rpms below 2500. The oil for the cam-lobes comes from oil sprayed off the connecting rods!
