dblp: Barbara Liskov

Argus—a programming language and system developed to support the implementation and

execution of distributed programs—provides mechanisms that help programmers cope with the special problems that arise in distributed programs, such as network partitions and crashes of remote nodes.

Distributed programming in Argus

Barbara Liskov is a pioneer in the design of computer programming languages, helping to make computer programs more reliable, secure, and easy to use. Her innovations can be found within almost all modern programming languages.
