A Bachelor of Science in Biomedical Engineering is a kind of bachelor's degree typically conferred after a four year undergraduate course of study in biomedical engineering (BME). The degree itself is largely equivalent to a bachelor of science and many institutions conferring degrees in the fields of biomedical engineering and bioengineering do not append the field to the degree itself.

Do-it-Yourself Prosthetics. Prosthetics was one of the first biomedical areas to be revolutionized by 3D printing and continues to grow as the technology becomes more democratized, making replacing limbs easier and cheaper.. Not long ago, ASME.org featured the RoboHand, a device fabricated on a 3D printer, developed by a South African carpenter Richard Van As and Ivan Owen from Bellevue, WA.

1. Introduction. Hydrogels are crosslinked network of hydrophilic polymers that can swell in water to capture many times their original mass. Physical and biochemical properties of hydrogels largely depend on their compositions, methods used for their polymerization, and their crosslinking density.

Silicon alkoxides represent the main network forming agents used in sol-gel preparation methods , , . While the sol-gel process provides key benefits, such as the low synthesis temperatures and the vast array of alkoxide precursors available, the cost associated with alkoxide precursors presents some limitations , . Nevertheless, the efficiency provided by low temperature synthesis and the ...
