Rated 5 out of 5 by Stefan from Stock compensators I have two Fat Boy Specials, both 2010 year models. Both were bought second hand with some 12.000 miles on the odo. When I got my first, I immediately reacted to the grinding sound at start but the dealer assured me this was quite normal on this model.

A big bang engine is an unconventional motorcycle engine designed so that most of the power strokes occur simultaneously or in close succession. This is achieved by changing the ignition timing, changing or re-timing the camshaft, and sometimes in combination with a change in crankpin angle. The goal is to change the power delivery characteristics of the engine.
