This is a purely information hunting post so I have a question or two. 1) What is the maximum HP anyone has seen for the M44 1.9l engine? I've seen kits at Dinan that can raise the horsepower to around 158 bhp. There have to be more horses without a darned nitrous system. 2) What performance gain would be possible from adding a Turbo or (if one is made) Twin Turbo kit?

Sorry to go off topic, but since the engine in my 2002 is worn out and will eventually go, Im planning (hopefully) to install a Nissan KA engine. Yes it will mean more work, especially with the brake booster location. But these engines are dirt cheap and have a very good aftermarket. Im wondering why only a few have looked into these.
